

June 12th, 2022

Dear villagers, team members, family members, and friends;

This brief letter will serve as an addition to the communication sent earlier this week on Wednesday, June 8th and Friday, June 10th regarding the current COVID-19 situation at Brewster Village.

We have received notice that four additional villagers have tested positive for COVID-19 and have been moved to receive care in the designated household. Also, three additional team members have tested positive for COVID-19. We had anticipated these results, and these individuals have not been working as a result. Please join me in wishing all those who are ill well in their recoveries.

Thank you once again to the Brewster Village team members who continue to provide compassionate, quality care despite these challenges. I appreciate all of your efforts during this challenging time, compounded with the stressors faced by a number of our coworkers out currently for infection control reasons.

Enhanced infection mitigation efforts are in place, including comprehensive surveillance testing. You will receive another update next week.

Sincerely,

Tim Neuman, NHA
Administrator
