

July 16th, 2022

Dear villagers, team members, family members, and friends;

I hope this letter finds you well.

This week, COVID-19 testing occurred for all staff, and villagers who were deemed to be a “close contact” to individuals who tested positive previously. I am pleased to report that all villager tests were returned negative. One team member did have a positive test returned, however this individual is linked to a known case outside of work, and as a result, had not been working at all during the most recent period. No villagers or team members are deemed to be a close contact with this individual. We wish our coworker and their family a speedy return to full health.

I am thankful to report that no quarantine periods needed to be extended, and all the remaining periods are set to expire within the coming days. All team members, regardless of vaccination status, will be tested again early next week.

You will receive notification of any additional positive cases identified, and if none are identified, at least one more letter informing you so.

Sincerely,

Tim Neuman, NHA
