

September 22, 2023

Dear Villagers, Team members, Family members and Friends;

Over the course of this past week we did not identify any new cases COVID-19. Contact trace testing has been completed. We are expecting to close this outbreak within a few days.

Public Health will be updated. They continue to partner with us when we are in outbreak and have deemed all of our steps to mitigate the spread of COVID-19 as appropriate.

We continue to encourage all visitors to follow guidelines of safe practice during their visit.

Safe practice:

- Consider rescheduling your visit if you are feeling unwell
- Wash/sanitize your hands on your way to visit
- If coughing, please consider wearing a mask
- Consider updating your vaccination for COVID

If visitors wish to wear a mask when visiting they will be available at the front desk.

Brewster Village team members remain diligent in infection control measures and for monitoring for the signs and symptoms of COVID-19. I continue to applaud their efforts in keeping the villagers and themselves safe.

Sincerely,

*Jennifer Hoelzel Bouhram RN, WCC*
